How to Contribute

Hi, if you are on this page, I'm assuming you would like to contribute to this website.

In order to contribute, you must first create an account. Click the **Sign up** link on the top right corner.

Editing a Recap

Let's say you want to add another paragraph to a recap of a specific anime:

1. Click **Shelves** on the top right corner. The shelves page should show you different categories such as Anime, Manga, and Other.
2. Click the **Anime** book.
3. Find the title of the anime you are looking for. If you cannot find the anime you are looking for, then it doesn't exist yet. You can be the first to create it! Check the section below to learn how.
4. Scroll to find the episode page you are looking for.
5. Click the **Edit** button under the **Actions** bar on the right side.
6. After you finish adding your edit, don't forget to click **Save Page** on the top right corner.

Creating a New Book

1. Click the shelf that the new book will belong in.
 2. Click **New Book** under the **Actions** side bar on the right.
 3. The book title should be the name of the anime/manga/media.
- Books can also be made through the **Books** page, but they must be added to the proper shelf manually. Therefore, going through the **Shelves** page is recommended as it will automatically place the book into the shelf you are in.

Creating a New Page

Depending on the page you make, there will be templates that can be used. For the sake of organization and consistency, using those templates are recommended. They may be changed in the future depending on the community's interests.

1. When editing a page, take a look at the right sidebar. Click the icon with the dotted square and two horizontal lines in the middle. It should show a list of templates
2. For a general/main page for an anime or manga, please use the **Anime Main Page** template. For an episode/chapter recap page, please use the **Anime Episode Template**

If you are confused about a book or page's basic layout, try checking out these two books as examples: [1](#) [2](#)
